### **Non-IFRS and Non-US GAAP Measures**

This news release references non-IFRS and non-U.S. GAAP financial measures, specifically Adjusted EBITDA, Pro Forma Adjusted Net Earnings, Pro Forma Adjusted Net Earnings per Diluted Share and Adjusted Net Leverage Ratio. Amaya believes these non-IFRS and non-U.S. GAAP financial measures will provide investors with useful supplemental information about the financial performance of its business, enables comparison of financial results between periods where certain items may vary independent of business performance, and allows for greater transparency with respect to key metrics used by management in operating its business. Although management believes these financial measures are important in evaluating Amaya, they are not intended to be considered in isolation or as a substitute for, or superior to, financial information prepared and presented in accordance with IFRS or U.S. GAAP. They are not recognized measures under IFRS or U.S. GAAP and do not have standardized meanings prescribed by IFRS or U.S. GAAP. These measures may be different from non-IFRS and non-U.S. GAAP financial measures used by other companies, limiting its usefulness for comparison purposes. Moreover, presentation of certain of these measures is provided for year-over-year comparison purposes, and investors should be cautioned that the effect of the adjustments thereto provided herein have an actual effect on Amaya's operating results. Amaya uses the following non-IFRS and non-U.S. GAAP measures in this release:

Adjusted EBITDA means net earnings (loss) from continuing operations before interest and financing costs (net of interest income), income taxes, depreciation and amortization, stock-based compensation, restructuring and other non-recurring costs.

Pro Forma Adjusted Net Earnings means Adjusted Net Earnings that is pro forma as if the divestiture of the entire B2B business occurred at December 31, 2014. Adjusted Net Earnings means net earnings from continuing operations before interest accretion, amortization of intangible assets resulting from purchase price allocation following acquisitions, stock-based compensation, foreign exchange, and other non-recurring costs. Adjusted Net Earnings per Diluted Share means Adjusted Net Earnings divided by Diluted Shares. Diluted Shares means Amaya's common shares on a fully diluted basis, including options, warrants and convertible preferred shares, using a denominator of 208 million shares, which is the assumption used in Amaya's full year 2015 guidance.

Adjusted Net Leverage Ratio means Adjusted Net Debt divided by Adjusted EBITDA. Adjusted Net Debt means total financial leverage minus cash (with cash including funds in excess of working capital requirements that Amaya currently expects to have set aside for the deferred payment that will be in Restricted Cash in Amaya's audited

consolidated financial statements for the year ended December 31, 2015) plus current investments less customer deposits liabilities, and after giving effect to the divestiture of the entire B2B business. This does not assume potential cash from the exercise of warrants with maturity dates extending beyond 2015.
